	Says What have we heard What can we imagin	-			Thinks What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?				
cheaper than they would. by taxis		They are going faster		uber drivers through their apps late at night	I think uber is just very different		There's no model to copy		Uber is acting as the facilitator
	Riders choose uber over other transportation methods for safety reasons		One of the world's largest crypto asset exchanges is ready for you			Uber cites its unique business model		A traveler could input their start location,date,time	
The company experienced		Also save money by using uber		This app is slower	Experience as a drivers		People would no longer have to wait		There are times when so many people are requesting rides
	The combination of uber and expanding online grocery delivery		Rowdy passengers even attacked drivers on some occasions			Uber quickly became popular in big cities like san fracisco and paris		When a lot of people are requesting ride in an area at the same time	
	uber - voyage vista								
	We opened our apl to developers globally over a year ago		Since then we've seen the creative way's	illuminati fron expec	ge vista: ing insights n uber ditionary alysis	Many believe that the failure of taxi companies to get customers to their destination quickly enough is what allow uber to thrive		Creating a cycle of inefficiency for taxi companies	
The project is helps to needy passengers		Added together that's a lot of time riders spend in an uber		Here are some of the ideas we are excited about	The taxi companies often blame their drivers		Being unable to pick up and transport passengers in a timely manner		The taxi drivers respond by complaining about the low fares
	We know thats people's time is precious and sometimes passengers just want to sit back and relax in peace		What if developers could also offer users of their apps new ways to enjoy themselves			Uber customers typically spend for less time waiting than customers of traditional taxi services		A common example is a creating spouse who suspect their passengers is being un faithful	
More then ever uber now makes it possible for developers		I filter the suitable data for this project		I insight the data with my team members	Public transportation doesn't run around the clock and not all taxi companies		People who work late at night often use uber to get home quickly		Riders choose uber over other transportation methods for safety reasons
